Muhammad Ali Akbar Al-Qahri

Data & AI Engineer | Data Analyst | Data Scientist | Data Engineer
+62 852-1194-4977 | akbaralqahri@gmail.com | Bandung, Indonesia
linkedin.com/in/akbaralqahri | github.com/akbaralqahri | akbaralqahri.github.io/portofolio

PROFESSIONAL SUMMARY

Data & AI Engineer with hands-on experience across data analytics, data science, and data engineering. Builds MySQL-to-Power BI reporting pipelines, production forecasting systems, browser-automation QC, and LLM-assisted content pipelines. Delivered 8 strategic dashboards, reduced reporting time by 40%, and automated 10K+ records for 200+ users while maintaining data quality, model validation, and stakeholder-ready communication.

EDUCATION

Bachelor of Science in Data Science **Aug 2021 - Feb 2025**
Telkom University *Bandung, Indonesia*
GPA: **3.74 / 4.00**

PROFESSIONAL EXPERIENCE

Data & AI Engineer **May 2026 - Present**
PT Cerebrum Edukanesia Nusantara *Bandung, Indonesia*
- Rebuilt forecasting as a FastAPI + Prophet service on the MySQL **_AllinMain** warehouse: SQL-side aggregation (about **3 rows per day** instead of millions) and a composite index cut queries from tens of seconds to milliseconds across **16 platforms**.
- Built QC Agent (Playwright, SQLite, Telegram) that pulls answer keys from the internal tryout system and sits each tryout expecting a perfect score; **33,500+ questions** verified before publish.
- Engineered **8 seed-based question generators** with built-in validation, and an LLM pipeline (Claude API + rule engine) for a 300-item TKA tryout with **2,422/2,422** computed keys re-verified.
- Moved the product task tracker from Apps Script to Vercel and GCP Cloud Run via GitLab CI, migrated **18 Sheets tabs** to MySQL, and added an MCP server for querying tasks and OKRs through Claude.
- Classified **3,375 Report Center tickets** and automated the monthly helpdesk dashboard: 81% user education, 5% genuine content fixes.

Data Analyst **Nov 2025 - May 2026**
PT Cerebrum Edukanesia Nusantara *Bandung, Indonesia*
- Built the first forecasting system (Streamlit + Prophet, grid-search tuning) for user, activity, and transaction peaks per platform, backed by **219 selection-calendar events** across 9 platform databases.
- Built a Markaz helpdesk analytics dashboard on a star schema tracking SLA attainment, handling time, and user segments.
- Prepared, transformed, and modeled MySQL data for Power BI KPI dashboards supporting operational monitoring and strategic reporting.

Database Engineer (Freelance) **Jun 2025 - Nov 2025**
Garda Abdi Negara *Remote*
- Developed a Google Gemini API text-processing solution with **92% accuracy**.
- Automated conversion of **10K+ test questions** for **200+ users**, reducing processing time by **75%**.

Data Science Teaching Assistant **Feb 2024 - Jun 2025**
Telkom University *Bandung, Indonesia*
- Improved student performance by **30%** through Python and SQL workshops and evaluated **500+ assignments**.

Data Analyst Intern **Jul 2024 - Oct 2024**
Bank Indonesia - South Sulawesi Representative Office *Makassar, Indonesia*
- Delivered **8 strategic Power BI dashboards** with **85% stakeholder satisfaction** for regional performance monitoring.
- Reduced reporting time by **40%** through dashboard automation across **5 regional branches**.

TECHNICAL SKILLS

Analytics & BI: SQL, Power BI, Looker Studio, Tableau, Excel, KPI design, financial analytics, stakeholder reporting

Data Science: Python, pandas, NumPy, scikit-learn, Prophet, Random Forest, XGBoost, SVM, time-series forecasting, rolling-origin validation

Data Engineering: MySQL, ETL, dimensional modeling, data validation, feature engineering, Git, Google Cloud

Applications, AI & Automation: FastAPI, Next.js, Streamlit, Playwright, Claude API, Gemini API, MCP, REST APIs, Plotly

PROJECTS

Cerebrum Multivariate Forecasting | *Prophet, FastAPI, MySQL, Plotly* **2026**
- **Data Scientist / Data Engineer:** Created a production-oriented multivariate forecasting platform backed by warehouse-level SQL aggregation.
- Implemented rolling-origin cross-validation, event-phase detection, what-if scenarios, correlation analysis, and persistent caching.

Data Analyst Internship Portfolio | *MySQL, ETL, Star Schema, Power BI* **2026**
- **Data Analyst / Data Engineer:** Built a multi-database ETL workflow and dimensional warehouse powering four production Power BI dashboards.
- Documented 120 internship tasks as a reproducible end-to-end business intelligence case study.

Peta Pendidikan Tinggi Indonesia | *JavaScript, Leaflet, Node.js, PDDIKTI* **2026**
- **Data Analyst / Data Engineer:** Mapped 5,433 institutions across 38 provinces and 514 cities/regencies in an interactive education intelligence application.
- Supported the application with an offline-ready pipeline and 34 independent data-quality checks.

Food Security Forecasting Dashboard | *Random Forest, Time Series, Streamlit, Plotly* **2025**
- **Data Scientist:** Achieved **R2 = 0.851** for food security forecasting across 34 Indonesian provinces.
- Applied time-series cross-validation, automated validation, feature importance, and provincial risk assessment.

Stock Minimum Price Classification | *XGBoost, SVM, Cramer's V, Financial ML* **2025**
- **Data Scientist:** Evaluated 1,023 feature combinations and achieved 89% classification accuracy for stock minimum-price classification.
- Received Best Paper at ICoDSA 2025 and publication in IEEE proceedings.

SNPMB Analyst | *Python, Streamlit, Plotly, Education Analytics* **2026**
- **Data Analyst / Data Scientist:** Built an interactive SNBT and SNBP decision-support application using 2021-2026 capacity and applicant data.
- Delivered program exploration, admission simulation, recommendations, and personal wishlists.

IPO Terminal - Indonesia Stock Exchange | *Financial Analytics, Valuation, Data Visualization* **2026**
- **Data Analyst:** Developed an interactive research terminal comparing six Indonesian issuers.
- Integrated valuation, capital-needs analysis, ARA scenarios, listing calendars, and investor scorecards.

Financial Planner Dashboard | *Python, Streamlit, Scenario Planning* **2026**
- **Data Analyst:** Created a personal-finance command center with an instant financial-health score.
- Combined budgeting, emergency-fund planning, debt payoff, financial goals, and FIRE simulation.

ACHIEVEMENTS & LEADERSHIP

- **Best Paper Award, ICoDSA 2025** - Published in IEEE proceedings; DOI: 10.1109/ICoDSA67155.2025.11157479.
- **Top 3 Final Project** - MySkill Data Analysis Bootcamp, 2025.
- **Patent Holder** - Educational Software, Patent No. 000639441.
- **Chairman** - Data Science Student Representative Board.

CERTIFICATIONS

- Data Analysis Fullstack Bootcamp - MySkill, 2025.
- Data Science Fundamental - MySkill, 2025.
- Time Series Analysis - MySkill, 2025.
